

Monthly Planning with Tarot

Use this template to create an overview of the month and plan your month

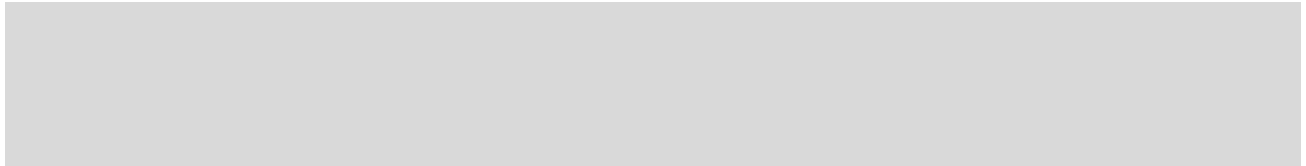

Calculate your month card and write or draw it here.

Take your year card and add the digit corresponding to the current month. For example, year card Chariot (7) and current month June (6): $7+6=14$. $14=$ Temperance

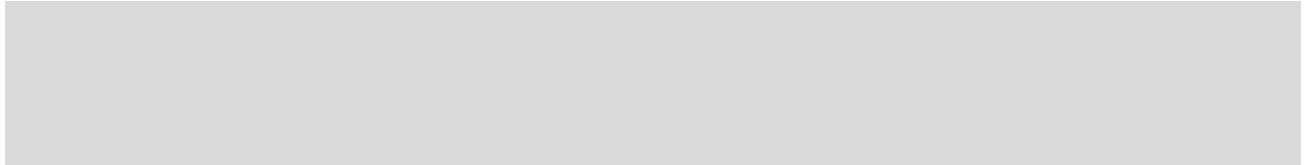

Year card = birthday month + birthday day + current year
reduce to a number between 1 and 21

Take a few moments and take in your month card. What comes to mind that connects to your present situation?

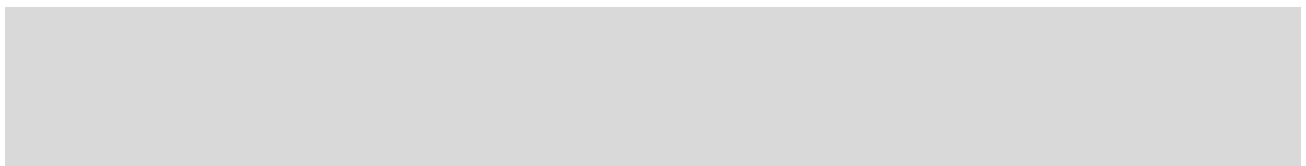

Did you have any repetition from the previous month? This could be number, suit, symbolism...

Given your month card that has been calculated, what do you think the texture or the theme of the month will be? laid back, busy, family oriented, confusing?

If you are bold enough to make any predictions, write them here:

Monthly Planning

Use this template to create an overview of the month and plan your month

Optional: pull a card at random to read with the calculated month card. How does the additional card change your perspective on the month ahead?

What actually happened last month and how did it line up with your month card or cards? Did you make any predictions? How did they manifest? Or not?

Was there any magic from the previous month you would like to bring forward into this month?
